## Examiner's Amendment

1. An Examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

2. Authorization for this Examiner's amendment was given in a telephone interview and/or FAX request with Mr. Daniel Biesterveld on December 20, 2006.

The application has been amended as follows:

- Claim 20, line 2: after "seconds", the following phrase was inserted: "at 300 W of continuous power at 20 kHz"; and
- Claim 21, line 2: after "seconds", the following phrase was inserted: "at 300 W of continuous power at 20 kHz".

## Reasons for Allowance

3. The present claims are deemed allowable over the references of record since the references of record fail to disclose or render obvious an abrasive article or a method of making an abrasive particle meeting the claimed limitations.

While the prior art of record disclose abrasive articles comprising similar components as in the present claims, as well as the use of superabrasive particles, the prior art of record fail to disclose or render obvious the selection of the additional elements such that "a majority of the superabrasive particles are dispersed as individual particles". The Examiner notes that the prior art clearly discloses that the abrasive

particles are known to agglomerate and that such agglomeration is acceptable to some degree. I.e. the prior art does not provide sufficient guidance to one of ordinary skill to "pick and choose" the claimed components such that "a majority of the superabrasive particles are dispersed as individual particles".

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
